DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3-4, 19-33, drawn to making coke, classified in class 208/132, 201/41 and others.
- II. Claims 8, 9, 34-72, drawn to a coke product, classified in class 201, subclass 41, 2.5, 25 and others.
- III(a). Claims 15-18 drawn to cleaning [coke] flue gases 431/2+.
- III(b). 73-76, drawn to burning coke to produce energy, classified in class 44, subclass 607 and others.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III (a and b) are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and their divergent subject matter, the search required for Group III is not required for Group I,

search required for Group I is not required for Group III the restriction for examination purposes as indicated is proper.

If Group III is elected:

This application contains claims directed to the following patentably distinct species of the claimed invention: Group III(a) The coke use as fuel and Group III(b)

A flue gas cleaning process (as best understood the flues are those generated from coke- otherwise the processes would be unrelated).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Jeffrey C. Norris on February 7, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bekir L. YILDIRIM whose telephone number is (703) 308-3586. The examiner can normally be reached on 10:30-8:00 (alternating Mondays off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn caldarola can be reached on (703) 308-6824.
